Asthma Policy

The White House Nursery recognises that asthma is an important condition affecting many children. The nursery welcomes all children with asthma and will encourage and help children to participate fully in all nursery activities.

The nursery will ensure that;

- 1) A register of children with asthma will be kept.
- 2) All children that use an inhaler for whatever reason will also be kept on the register.
- 3) All asthma children on register should have written details on an asthma card, as to what dosage, when to use etc.
- 4) Spare inhalers (blue only) to be kept at nursery clearly named.

Under 3's need a spacer and mask. Dosage - 1 Puff = 10 Counts

Over 3's need a spacer. Dosage - 1 Puff = 5 Counts

ALWAYS USE A SPACER

If the nursery spacer is used wash in **soapy water** and dry thoroughly.

ASTHMA ATTACK - Repeat inhaler as necessary. You cannot overdose. If after 10 puffs there has been no change in attack phone 999.

The White House Nursery aims to help children in the nursery understand about asthma by books, stories and home corner play.

The nursery will also ensure that staff receive sufficient training about asthma with regular updates when necessary.
